

# Mobility 56

## Product Summary

---

The Mobility 56 kit adds mobility to any IQAir system. It also optimises air circulation patterns in any environment by raising the filtration unit's air intake by 10 cm (4") off the ground.

### **Installation**

No tools or assembly are required to attach the Mobility 56 base extension kit. Simply slide the base blocks into the filtration unit's base and tighten four wing nuts.

If mobility is no longer required, the casters can be removed again.

### **IQAir Compatibility**

Compatible with all IQAir filtration devices. Not compatible with the FlexVac and VM FlexVac accessories.
